Clear message sent to parents that students should not be sent into school if unwell for both Covid-19 and any other illnesses/symptoms. Staff Individuals classed as clinically extremely vulnerable to have a risk assessment undertaken on their role. School to discuss arrangements / concerns with individuals and provide assurance of controls in place (i.e. hand washing, enhanced cleaning, ventilation, managing confirmed / suspected cases, LFD testing) and through the risk assessment process determine if any additional measures are required. This should consider if these staff are able to work from home or in areas / roles where limiting close contact is easier. 		<p>School to obtain the risk assessment from contract cleaning staff for assurance on social distancing measures and their schedule / methods for cleaning the school site.</p> <p>In the event of a suspected case / confirmed positive case on site For disinfection (e.g. following a suspected case) use a combined detergent disinfectant solution at a dilution of 1000 parts per million (ppm) available chlorine (av.cl.) or a neutral purpose detergent followed by disinfection (1000 ppm av.cl.). See PHE advice COVID-19: cleaning of non-healthcare settings guidance if an alternative non-chlorine based disinfectant is used ensure that it is effective against enveloped viruses i.e. a product to BS EN14476.</p> <p>When cleaning a contaminated area: Cleaning staff to:</p> <ul style="list-style-type: none"> • Wear disposable gloves and apron • Wear a fluid resistant surgical mask (Type IIR) if splashing likely • Hands should be washed with soap and water for 20 seconds after all PPE has been removed. <p>PPE to be double-bagged, then stored securely for 72 hours then thrown away in the regular rubbish after cleaning is finished.</p> <p>Any cloths and mop heads used must be disposed of as single use items.</p>		Staff supervising symptomatic individuals in school		
Poorly ventilated spaces	<p>Staff, Students / pupils / wider contacts</p> <p>Spread of COVID 19</p>	<p>Occupied rooms to be kept as well ventilated as possible (by opening external windows / doors) or via mechanical ventilation systems.</p> <p>Where mechanical ventilation is present that removes and circulates air to multiple rooms, increase ventilation rate and recirculation should be turned off adjust these to full fresh air where possible. There is no need to adjust systems that serve only individual rooms or portable units as these operate on 100% recirculation. See HSE guidance and CIBSE COVID-19 ventilation guidance (v5 July 21)</p> <p>In cooler weather open windows just enough to provide constant background ventilation, open windows more fully between classes, during breaks etc. to purge the air in the space. Use heating / additional layers of clothing to maintain comfortable temperatures.</p> <p>Ensure key fire doors are not being compromised / wedged open (those protected stairwells, cross corridor, on single directional routes etc.)</p>	<p>Identify any poorly ventilated areas and take steps to improve. A CO₂ monitor can help identify if the space is poorly ventilated (CO₂ levels of between 800-1000ppm are indicative of a well-ventilated room.)</p> <p>Use high level windows where available to minimise drafts.</p> <p>Where lower level windows are being opened out onto play areas then ensure these don't create a risk of pupils running into the edge of an open window.</p>	<p>Room occupants</p> <p>Site staff</p>	Daily
